ELEMENT 1 - GOAL

The City of Hollister (City) has the following goals for the management and maintenance of the sanitary sewer collection system. These goals provide focus for City Staff to continue high-quality work to operate and maintain City facilities and to implement improvements for management of the collection system to prevent sanitary sewer overflows (SSOs). The role of the SSMP in supporting these goals is discussed below. These goals will be evaluated annually in Element 9: Monitoring, Measurement and Program Modification to assess the City’s success in implementing and meeting the objectives of these goals.

1.1 Regulatory Requirement
WDR Order No. 2006-0003-DWQ Section D.13(i) states:

The goal of the SSMP is to provide a plan and schedule to properly manage, operate, and maintain all parts of the sanitary sewer system. This will help reduce and prevent SSOs, as well as mitigate any SSOs that do occur.

1.2 Sanitary Sewer System Goals [WDR D.13(i)]
The City seeks to provide high quality and reliable wastewater collection for its residents and businesses.

City SSMP Goals:

- Have less than 5 SSOs in 2016 and 2017 calendar years.
- Purchase a Vac Con truck that is dedicated to the sewer system. The current Vac Con is used for both sewer and storm drain cleaning.
- Evaluate hiring 1-2 FTE Utility Maintenance staff dedicated to sewer system operations, maintenance and management.
- Analyze CCTV Data to develop a Rehabilitation and Replacement Program based on CCTV findings by the end of 2016/17 fiscal year.
- Clean the entire collection system on a biennial (2year) schedule.
