1,2,3-Trichloropropane Monitoring Requirements Not Met for the City of Hollister During 2nd Quarter 2018

Our water system recently failed to monitor as required for a drinking water standard during 2nd Quarter 2018 and, therefore, was in violation of the regulations. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the 2nd Quarter 2018, we did not collect a 1,2,3-trichloropropane (1,2,3-TCP) sample from Bundeson Road Well 02.

What should I do?

- There is nothing you need to do at this time.
- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

The City of Hollister will complete initial 1,2,3-TCP monitoring as required by regulation.
