

## **ELEMENT 7 - FATS, OILS, AND GREASE CONTROL PROGRAM**

The City of Hollister has over one hundred food service establishments (FSEs) within its jurisdiction. The breakdown of types of FSEs is graphically portrayed below in Figure 7-1. The City is in the process of developing a Fats, Oils and Grease (FOG) Control Program as FOG has been identified as a historical cause of Sanitary Sewer Overflows (SSOs) and maintenance issues.

The metrics that the City uses to monitor the effectiveness of the FOG Control Program are presented in Element 9 – Monitoring, Measurement, and Program Modifications.

The primary goal of the City of Hollister’s FOG Control Program is to decrease the amount of FOG entering the sanitary sewer system to minimize the risk of SSOs.

**Figure 7-1: Types of Food Service Establishments in City of Hollister Service Area**

### **7.1 Regulatory Requirements**

WDR Order No. 2006-0003-DWQ Section D.13(vii) states:

Each Enrollee shall evaluate its service area to determine whether a FOG control program is needed. If an Enrollee determines that a FOG program is not needed, the Enrollee must provide justification as to why it is not needed. If FOG is found to be a problem, the Enrollee must prepare and implement a FOG source control program to reduce the amount of these substances discharged to the sanitary sewer system. This plan shall include the following as appropriate:

- (a). An implementation plan and schedule for a public education outreach program that promotes proper disposal of FOG;

- (b). A plan and schedule for the disposal of FOG generated within the sanitary sewer system service area. This may include a list of acceptable disposal facilities and/or additional facilities needed to adequately dispose of FOG generated within a sanitary sewer system service area;
- (c). The legal authority to prohibit discharges to the system and identify measures to prevent SSOs and blockages caused by FOG;
- (d). Requirements to install grease removal devices (such as traps or interceptors), design standards for the removal devices, maintenance requirements, BMP requirements, record keeping and reporting requirements;
- (e). Authority to inspect grease producing facilities, enforcement authorities, and whether the Agency has sufficient staff to inspect and enforce the FOG ordinance;
- (f). An identification of sanitary sewer system sections subject to FOG blockages and establishment of a cleaning maintenance schedule for each section; and
- (g). Development and implementation of source control measures for all sources of FOG discharged to the sanitary sewer system for each section identified in (f) above.

## **7.2 FOG Control Program Public Education and Outreach [WDR D.13(vii)(a)]**

### **7.2.1 FSE Education and Outreach**

The City of Hollister recognizes that FOG is an ongoing challenge as a source of sewer system backups and SSOs. The City plans to develop a FOG Control Program to address SSOs caused by FOG. This program will be developed by April 2017 and implemented in May 2017. The program will begin with both residential and commercial outreach and education through the development of the following FOG Control information sources:

#### **Residential Outreach and Education**

- FOG Information Web Page on City Website
- Semi Annual Articles in the City Newsletter
- Flyers with residential FOG information at City Administrative Buildings
- Door Hangers to notify residential sewer users when FOG is encountered during sewer line cleaning

#### **Commercial Outreach and Education**

- FOG Information Web Page on City Website
- Letter to all Food Service Establishments (FSEs) informing them of the City's FOG Control requirements and FOG Control Program
- Development of FSE outreach materials, discharge permits and best management practices for FSEs

Examples of these Outreach and Education materials will be include in Appendix 07-A when completed.

### 7.2.2 FOG Control Program

The City's FOG Program will begin with outreach and this will remain a major component throughout the program. The City firmly believes that by having Food Service Establishments (FSEs) and the residential community understand the value in reducing the amount of grease in the City's sewer lines the public can uniformly improve collection system efficiency and the costs associated with grease related overflows. The City plans to begin implementation of this program in April 2017.

Formal Inspections and initial permitting efforts for each FSE will begin in May 2017. The City will visit each site identified on the City of Hollister FSE List located in Appendix 07-B. A standard FOG Permit application and subsequent FOG Discharge Permit will be issued to all FSEs that have the potential to discharge FOG into the sewer system. A Variance Permit will be issued to FSEs that have kitchen facilities but do not currently produce FOG in quantities that may impact the City's sewer system. FOG Discharge Permits will require FSEs to follow all Best Management Practices (BMPs), maintain and operate a Grease Control Device and maintain a cleaning log on the premises. A review of the cleaning log and maintenance information will be required during each inspection. All FSEs with a FOG Permit will be inspected twice a year. FSEs with a Variance Permit will be inspected once a year to verify the facility and/or menu has not changed enough to require a standard FOG Permit and Grease Control Device.

In cases where a facility does not currently maintain a grease trap or interceptor, installation may be required. Installation will be based upon current Uniform Plumbing Code (UPC) and the City's Municipal Code. The current UPC is utilized to determine the type and size of unit that will be required. Justification for trap versus interceptor installation will be based upon foods served and prepared, number of drains found within the facility, size and history of the establishment. Dye testing may also be conducted when it is necessary to determine specific drainage.

During routine site visits each FSE inspectors will provided the FSE owner with a:

- FOG Control Program Flyer;
- FOG Best Management Practices (BMP) Booklet;
- Grease Hauler List;
- Cleaning Record Form; and a
- "No Grease" Poster.

FOG Permits will be non-transferrable and are re-issued annually after checking for facility changes. FSEs are inspected on a semiannual frequency. FSE compliance is tracked, and FSEs are given a specific number of days to correct violations. Re-inspections will occur for all FSEs found to be out of compliance with the City's FOG Control Program until violations of the City's program are corrected. FOG Program materials will be included in Appendix 07-C when completed in April 2017.

**7.3 FOG Disposal Facilities [WDR D.13(vii)(b)]**

The City does not own or operate a FOG disposal facility. Licensed FOG hauling contractors are available for the Hollister area and are required to dispose of grease to a certified disposal facility. The frequency of cleaning for a FSE’s grease control device will be on a case by case basis and therefore a schedule for FOG disposal will also be on a case by case basis.

A list of FOG pumping and/or FOG waste hauling contractors in San Benito and Monterey Counties is provided in Appendix 07-D.

**7.4 Discharge Prohibition Legal Authority and SSO Prevention Measures [WDR D.13(vii)(c)]**

The legal authority to prohibit discharges to the collection system and identify measures to prevent FOG-caused SSOs is found in the City’s Municipal Code.

For reference, Appendix 07-E contains a copy of applicable sections of Chapter 13.04, Sewer Service System in their entirety.

Table 7-1 summarizes where the City has established the legal authorities to prohibit FOG discharges and where measures are identified to prevent SSOs and blockages caused by FOG.

**Table 7-1: City of Hollister FOG Legal Authority**

WDR Requirement	City of Hollister Municipal Code Section	Specific Language
Prohibit FOG discharges to collection system	13.04.090 D	No person shall discharge or cause to be discharged any of the following into any public sewer:  D. Solid or viscous substances in quantities or of such size as to be capable of causing obstructions to the flow in sewers or the interference with the proper operation of the sewer works, such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastic, wood, underground garbage, whole blood, parched manure, hair and fleshing, whole or ground paper, dishes, cups, milk containers, etc. (Editorially amended during 1998 codification; prior code § 16-9)
Prohibit FOG discharges to collection system	13.04.100 B	No person shall discharge or cause to be discharged into any sewer any of the following if, in the opinion of the director, the same may damage or injure the sewer, sewage treatment plant, sewage treatment process, sewage treatment equipment, or have an adverse effect on the receiving stream, endanger the public or constitute nuisance. In determining the

WDR Requirement	City of Hollister Municipal Code Section	Specific Language
		<p>acceptability of the following, the director shall consider such factors as the quantity to be received in relationship to the flows and velocities in the sewer, the materials of construction of the sewers, the nature of the sewer treatment process, the capacity of the sewer treatment plant, the degree of treatability of the following in the sewer treatment plant and other related factors. The prohibited substances are as follows:</p> <p>B. Any water or waste containing fats, wax, grease or oils, whether emulsified or not, in excess of one hundred (100) milligrams per liter or containing substances which may solidify or become viscous at temperatures between thirty-two (32) degrees and one hundred fifty degrees (150) Fahrenheit (zero degrees and sixty-five (65) degrees centigrade);</p>

<b>WDR Requirement</b>	<b>City of Hollister Municipal Code Section</b>	<b>Specific Language</b>
Identify measures to prevent SSOs and blockages caused by FOG	13.04.120	Grease, oil and sand interceptors shall be provided when, in the opinion of the director, they are necessary for the proper handling of liquid wastes containing grease, flammable waste, sand or other harmful ingredients, except that such interceptors shall not be required for dwelling units. All interceptors shall be of a type and capacity approved by the director and shall be located so as to be readily and easily accessible for cleaning and inspection. Failure to clean or maintain interceptors shall be grounds for discontinuance of service or other punitive action as provided in this chapter. (Prior code § 16-12)
Identify measures to prevent SSOs and blockages caused by FOG	13.04.110	If any water or waste is discharged or is proposed to be discharged to the public sewers, which water contains the substances or processes and characteristics enumerated in Section 13.04.100 or which, in the judgment of the director, may have a deleterious effect upon the sewer treatment works, processes, equipment or receiving waters, or which constitutes a danger to public health, safety or welfare, or which constitutes a public nuisance, the director may: <ul style="list-style-type: none"> <li>A. Reject the water or waste;</li> <li>B. Require pretreatment to an acceptable condition for discharge to the public sewer;</li> <li>C. Control quantity or rate of discharge;</li> <li>D. Require payment to cover the additional costs and expenses of handling and treating the wastes not covered by existing fees and charges under other provisions of this chapter;</li> <li>E. Refuse to furnish service or discontinue service. (Prior code § 16-11)</li> </ul>

**7.5 Grease Removal Devices Design, Installation, and Maintenance Requirements [WDR D.13(vii)(d)]**

The table below summarizes where the City has established the legal authorities to meet the above FOG Program requirements.

**Table 7-2: Grease Removal Device Design, Installation, and Maintenance Requirements [WDR D.13(vii)(d)]**

WDR Requirement	City of Hollister Municipal Code Section	Specific Language
FSE to Install Grease Removal Device	13.04.120	Grease, oil and sand interceptors shall be provided when, in the opinion of the director, they are necessary for the proper handling of liquid wastes containing grease, flammable waste, sand or other harmful ingredients, except that such interceptors shall not be required for dwelling units. All interceptors shall be of a type and capacity approved by the director and shall be located so as to be readily and easily accessible for cleaning and inspection. Failure to clean or maintain interceptors shall be grounds for discontinuance of service or other punitive action as provided in this chapter. (Prior code § 16-12)
Grease Removal Devices – Design Standards	15.04.050	<p>The following codes, which are on file and available for public inspection at City Hall, are adopted by reference as fully as if set forth verbatim.</p> <p>A. 2013 Edition of the California Building Standards, Title 24 of the California Code of Regulations, in its entirety consisting of the following parts:</p> <p style="padding-left: 40px;">-Part 5- California Plumbing Code;</p>
Grease Removal Devices – Maintenance	<i>To be developed as part of the City's FOG Control Program</i>	<i>To be developed as part of the City's FOG Control Program</i>
Grease Removal	<i>To be developed as</i>	<i>To be developed as part of the City's FOG</i>

<b>WDR Requirement</b>	<b>City of Hollister Municipal Code Section</b>	<b>Specific Language</b>
Devices – Best Management Practices (BMPs)	<i>part of the City's FOG Control Program</i>	<i>Control Program</i>
Grease Removal Devices – Record Keeping and Reporting	<i>To be developed as part of the City's FOG Control Program</i>	<i>To be developed as part of the City's FOG Control Program</i>

**7.6 FOG Control Program Inspection, Enforcement, and Staffing [WDR D.13(vii)(e)]**

The City of Hollister's FOG Control Program Inspection and Enforcement legal authorities are described in Section 7.6.1 below and FOG Control Program staffing is described in Section 7.6.2 below.

**7.6.1 FOG Control Program Inspection and Enforcement**

Table 7-3 summarizes where the City has established the legal authorities to inspect grease producing facilities. The City is responsible for enforcement as outlined by City Municipal Code, Chapter 1.16.090 entitled Code Enforcement. Appendix 07-E contains applicable sections of Chapter 1.16.090 in their entirety.

**Table 7-3: FOG Control Program Inspection and Enforcement Legal Authorities**

<b>WDR Requirement</b>	<b>City of Hollister Municipal Code</b>	<b>Specific Language</b>
Authority to inspect grease producing facilities	1.16.090	Enforcement officials are authorized to exercise the powers necessary to gain compliance with the provisions of city codes or applicable state law. These powers include the power to issue compliance orders and field citations, inspect public and private property, and use whatever judicial and administrative processes and remedies are available under city codes or state law. (Ord. 891 § 1, 1997: prior code § 1A-10)
Authority to enforce FOG Program Requirements	1.16.090	Enforcement officials are authorized to exercise the powers necessary to gain compliance with the provisions of city codes or applicable state law. These powers include the power to issue compliance orders and field citations, inspect public and private property, and use whatever judicial and administrative processes and remedies are available under city codes or state

WDR Requirement	City of Hollister Municipal Code	Specific Language
		law. (Ord. 891 § 1, 1997: prior code § 1A-10)

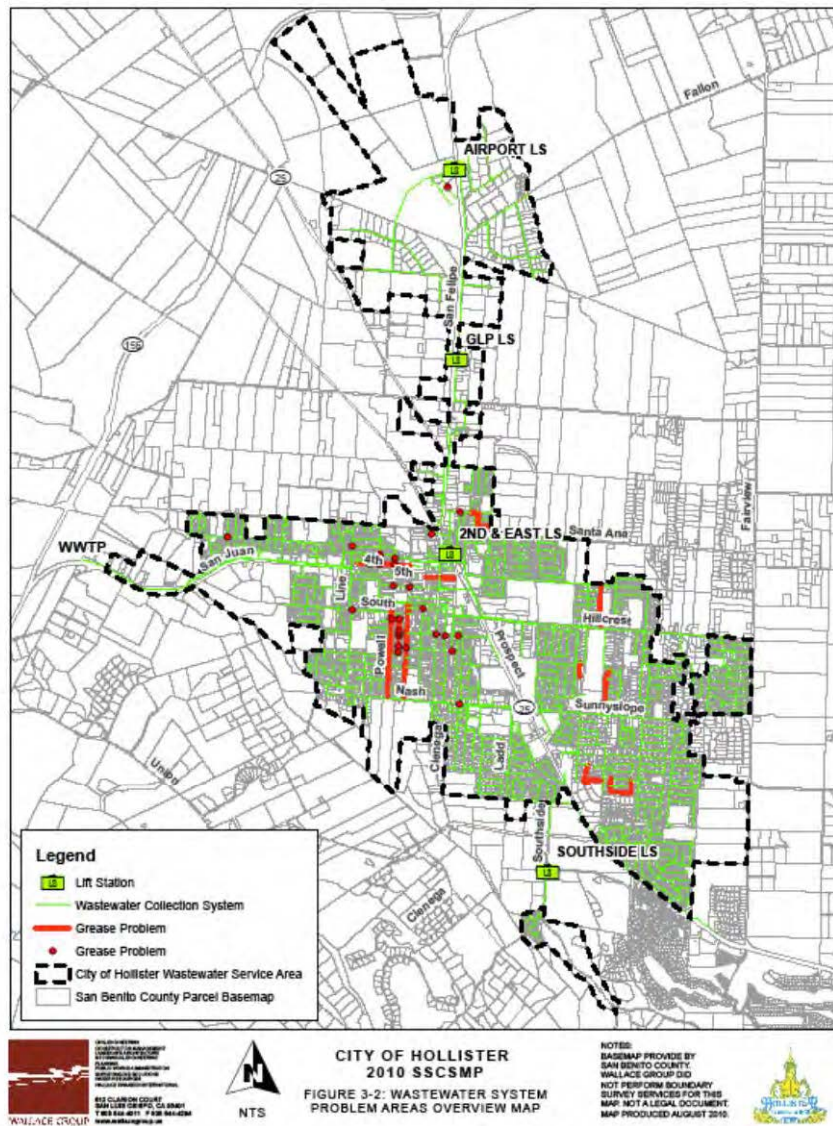

**7.6.2 FOG Control Program Staffing**

The City is in the process of developing a FOG Control Program that will meet the City’s goals to reduce FOG related SSOs. Staffing levels are in the process of being evaluated to enable the City to properly staff a formal FOG Control Program. A staffing plan for public outreach, permitting and inspection will be completed by June 2017. A table demonstrating how the City will staff this program and specific FOG Program roles and responsibilities will be include in Appendix 07-F when complete.

**7.7 Grease Problem Area Identification and Sewer Cleaning [WDR D.13(vii)(f)]**

The City’s goal is to clean the entire collection system every two years, as described in Element 4 – Operation and Maintenance Program. Areas of the City that require more frequent cleaning (High Maintenance Areas (HMAs)) due to FOG are inspected weekly and cleaned when there is a visual indication of obstructed flow conditions or based on other conditions that may warrant cleaning. A general overview map of HMAs is located in Figure 7-2. A list of HMAs is located in Appendix 07-G.

**Figure 7-2: City of Hollister FOG Related High Maintenance Areas**

**7.8 Source Control Measure Development and Implementation [WDR D.13(vii)(g)]**

As of this SSMP update, the City is not planning additional source control measure development and implementation in addition to the program listed above.

List of FOG/Grease Hauling Companies

## Grease Hauling & Rendering Companies

This list is provided to Food Service Establishments (FSEs) only as a convenience, and does not imply an endorsement of the services provided by any of the listed companies. The City of Hollister (City) makes no claims or representations, explicit or implied, regarding the performance of the following service providers. The City encourages FSEs to exercise due diligence when hiring a pumping and/or waste hauling contractor. The list is based upon information available at the time and may not include every company offering such services.

Liquid Waste Haulers	
All Valley Environmental, Inc.	(559) 498-8378
Ameriguard Maintenance Services	(800) 347-7876 ext 14
Bay Pumping	(831) 320-5229
Greenline/Tom's Septic Tank Service	(831) 422-2298
One More Time	(800) 624-5504
Peninsula Septic Tank Service	(831) 659-2465
One More Time	(800) 624-5504
Salinas Tallow	(800) 621-9000
Trap Recyclers Inc.	(800) 994-7867

IN NO EVENT SHALL THE CITY BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES OF ANY KIND WHATSOEVER WITH RESPECT TO THE SERVICES PROVIDED BY THE LISTED COMPANIES.

[Title 13 PUBLIC SERVICES](#)

[Chapter 13.04 SEWER SERVICE SYSTEM](#)

[Article II. Use of Public Sewers](#)

### **13.04.090 Materials prohibited in sewers.**

No person shall discharge or cause to be discharged any of the following into any public sewer:

- A. Any gas, benzene, naphthol, fuel, oil, or other flammable or explosive solid, liquid or gas;
- B. Any water or waste containing toxic or poisonous solid, liquids or gases in sufficient quantities, either singularly or in reaction with other wastes, to injure or interfere with other sewage treatment processes, constitute a hazard to humans or animals, create a public nuisance, create any hazard in any receiving water of the sewage treatment plant, including, but not limited to, cyanides in excess of two milligrams per liter as carbon nitrogen in the wastes discharged to the public sewer;
- C. Any water or waste having a pH lower than 5.5 or having any other corrosive properties capable of causing damage or hazard to structures, equipment or personnel of the sewage works;
- D. Solid or viscous substances in quantities or of such size as to be capable of causing obstructions to the flow in sewers or the interference with the proper operation of the sewer works, such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastic, wood, underground garbage, whole blood, parched manure, hair and fleshing, whole or ground paper, dishes, cups, milk containers, etc. (Editorially amended during 1998 codification; prior code § 16-9)

<a href="#">Title 13 PUBLIC SERVICES</a>							
<a href="#">Chapter 13.04 SEWER SERVICE SYSTEM</a>							
<a href="#">Article II. Use of Public Sewers</a>							

### **13.04.100 Materials director may prohibit.**

No person shall discharge or cause to be discharged into any sewer any of the following if, in the opinion of the director, the same may damage or injure the sewer, sewage treatment plant, sewage treatment process, sewage treatment equipment, or have an adverse effect on the receiving stream, endanger the public or constitute nuisance. In determining the acceptability of the following, the director shall consider such factors as the quantity to be received in relationship to the flows and velocities in the sewer, the materials of construction of the sewers, the nature of the sewer treatment process, the capacity of the sewer treatment plant, the degree of treatability of the following in the sewer treatment plant and other related factors. The prohibited substances are as follows

A. Any liquid or vapor having a temperature of higher than one hundred fifty (150) degrees Fahrenheit (sixty-five (65) degrees centigrade);

B. Any water or waste containing fats, wax, grease or oils, whether emulsified or not, in excess of one hundred (100) milligrams per liter or containing substances which may solidify or become viscous at temperatures between thirty-two (32) degrees and one hundred fifty degrees (150) Fahrenheit (zero degrees and sixty-five (65) degrees centigrade);

C. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipment with a motor of three-quarters horsepower (.76 horsepower, metric) or greater, shall be subject to the approve of the director;

D. Any water or waste containing acids, iron pickling, or concentrated plating solutions, whether neutralized or not;

E. Any water or waste containing iron, chromium, copper, zinc or other similar toxic substances or wastes exerting an excessive chlorine requirement to such degree that any such material received in the composite sewage at the sewer treatment plant exceeds the limits established by the director for such materials;

F. Any water or waste containing phenols or taste or odor-producing substances, in such concentrations exceeding limits which may be established by the state of California or the United States, or agencies thereof having jurisdiction over the discharge thereof to receiving waters;

G. Any radioactive wastes or isotopes such as half-lives or concentrations as may exceed limits as established by the director in compliance with applicable state and federal regulations;

H. Any water or wastes having a pH in excess of 9.5;

I. Materials which exert or cause:

1. Unusual concentrations of suspended solids (such as, but not limited to, fuller's earths, lime slurries, and lime residuals or organic materials) or of dissolved solids (such as, but not limited to, starches, sugars, sodium chloride, and sodium sulfate),

2. Excessive discoloration (such as, but not limited to, dye, wastes and vegetable tanning solutions),

3. Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities so as to constitute a significant load on the sewer treatment plant,

4. Any unusual volume or flow of concentration of wastes which upsets or affects the balance of the sewer treatment plant;

J. Water or waste containing substances which are not admittable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewer treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over the discharge of the receiving waters. (Prior code § 16-10)

Title 13 PUBLIC SERVICES

Chapter 13.04 SEWER SERVICE SYSTEM

Article II. Use of Public Sewers

---

**13.04.110 Action resulting from deposit of deleterious wastes.**

---

If any water or waste is discharged or is proposed to be discharged to the public sewers, which water contains the substances or processes and characteristics enumerated in Section 13.04.100 or which, in the judgment of the director, may have a deleterious effect upon the sewer treatment works, processes, equipment or receiving waters, or which constitutes a danger to public health, safety or welfare, or which constitutes a public nuisance, the director may:

- A. Reject the water or waste;
- B. Require pretreatment to an acceptable condition for discharge to the public sewer;
- C. Control quantity or rate of discharge;
- D. Require payment to cover the additional costs and expenses of handling and treating the wastes not covered by existing fees and charges under other provisions of this chapter;
- E. Refuse to furnish service or discontinue service. (Prior code § 16-11)

Title 13 PUBLIC SERVICES

Chapter 13.04 SEWER SERVICE SYSTEM

Article II. Use of Public Sewers

---

**13.04.120 Grease traps required.**

---

Grease, oil and sand interceptors shall be provided when, in the opinion of the director, they are necessary for the proper handling of liquid wastes containing grease, flammable waste, sand or other harmful ingredients, except that such interceptors shall not be required for dwelling units. All interceptors shall be of a type and capacity approved by the director and shall be located so as to be readily and easily accessible for cleaning and inspection. Failure to clean or maintain interceptors shall be grounds for discontinuance of service or other punitive action as provided in this chapter. (Prior code § 16-12)

Title 15 BUILDINGS AND CONSTRUCTION

Chapter 15.04 HOLLISTER BUILDING CODE

### **15.04.050 Construction codes adopted by reference.**

---

The following codes, which are on file and available for public inspection at City Hall, are adopted by reference as fully as if set forth verbatim.

A. 2013 Edition of the California Building Standards, Title 24 of the California Code of Regulations, in its entirety consisting of the following parts:

Part 1 California Building Standards Administrative Code;

Part 2 California Building Code;

Part 2.5 California Residential Building Code;

Part 3 California Electrical Code;

Part 4 California Mechanical Code;

Part 5 California Plumbing Code;

Part 6 California Energy Code;

Part 8 California Historical Building Code;

Part 9 California Fire Code;

Part 10 California Existing Building Code;

Part 11 California Green Building Standards Code;

Part 12 California Reference Standards Code.

B. Uniform Code for the Abatement of Dangerous Buildings, 1997 Edition.

C. Uniform Swimming Pool, Spa and Hot Tub Code, 2009 Edition.

D. Uniform Solar Energy Code, 2009 Edition. (Ord. 1096 § 1, 2013)
